Inspiring Futures

A high-quality computing education ensures that pupils become digitally literate – able to use, express themselves, and develop their ideas through information and communication technology – at a level suitable for the future workplace and as active participants in a digital world.

From an education perspective, near-unlimited access to the internet can be hugely beneficial to young people. It opens up a world of information to them, giving them access to all kinds of news, views and perspectives at the click of a button.

But it's also home to a lot of unsuitable content and potential abuse, which is why it's important to make sure that your staff members feel confident and equipped to teach online safety and that they know what signs to look out for if a pupil is in a potentially dangerous online situation.

Entrust will help your school implement a coherent, impactful computing curriculum and ensure your staff are aware of the risks young people may be exposed to online and how to respond to them.

How we can help you

Based on feedback from schools across England, we've designed two packages of support that will help you deliver the national computing curriculum and support you to meet your safeguarding responsibilities.

Choose just one package for £499 or purchase both for £900 and save £98!

Online Safeguarding

This package of support will help your school to build upon existing practice to ensure online safeguarding is an integral part of your safeguarding responsibilities, enabling staff to be knowledgeable and responsive, and aware of risks young people may be exposed to online. This robust and comprehensive training package comes with an exclusive saving.

This package includes...

- **Online Safeguarding workshop for staff**
Fulfilling part of your statutory safeguarding training requirements to cover online safety, this 60 minute annual update for your school staff covers online safeguarding and online safety issues that can affect young people.
- **Online Safeguarding for Designated Safeguarding Leads course (one delegate place)**
This session provides confidence that safeguarding leads have the relevant knowledge and up to date capability required to keep children safe whilst they are online at school or college.
- **Online Safety in the Primary Curriculum course (one delegate place)**
Examine the statutory online safety elements from Keeping Children Safe in Education and consider the Relationships and Health Education requirements alongside the programmes of study for computing in a primary school. Gain understanding of statutory online safety responsibilities, be able to reflect on current provision and identify gaps, and know effective reporting routes for online safety concerns.
- **Online Safety Conference**
Hear updates from Entrust consultants and expert guest speakers from the world of online safeguarding.
- **KCSiE update and guidance webinar session**
30 minute webinar when new KCSiE documentation is released. Perfect for head teachers and designated safeguarding leads
- **Termly Online Safety Newsletter**

Computing Leadership & Development

Let our outstanding subject specialists help your school implement a coherent, impactful computing curriculum, that is robust and deep dive ready. These sessions are designed to upskill the computing leader, so they are more knowledgeable, confident and skilful in implementing an effective computing strategy for your school. The support package combines our most popular training and offers an exclusive saving.

This package includes...

- **Computer Leaders Development Group Meetings (one delegate place)**
Three meetings are facilitated by a computing consultant to allow computing curriculum leads to share best practice, experiences and discuss challenges they face in developing and embedding the use of technology.
- **Leading Computing in a Primary School (one delegate place)**
Subject Leaders are crucial to a school's success through their role in securing and sustaining improvement in their area of the curriculum. This course includes:
 - Webinar 1** - A deep dive approach into evaluating the provision of computing as a discrete and cross-curricular subject.
 - Webinar 2** - Includes coverage of the national curriculum objectives and how these are used to devise a consolidating and progressive curriculum across the key stages.
 - Webinar 3** - Understanding the statutory online safety responsibilities and provision of online safety education. Reflecting on national benchmarks in the area of online safety in schools.
- **Programming with Scratch (one delegate place)**
Scratch is a popular, easy, and free tool that is used to write simple programs. This half day remote course is an introductory course that will help staff gain the knowledge and skills needed to teach pupils to programme.
- **Making an Impact Event**
Attendance at our annual Making an Impact events where we will share key updates and best practice.

Why choose us?

We will upskill your staff

Our online safety consultants have a thorough understanding of how your school can improve its provision for online safety in line with Ofsted guidance, as well as up-to-date knowledge of online safety issues both inside and outside of the school environment.

We will help you meet your statutory requirements

We will help make sure that your school stays up to date with current issues and the appropriate practice, as well as meeting statutory requirements.

We're a trusted partner

We have vast experience in supporting schools to understand and address the relationship between wellbeing and life in a digital world, we're often asked to speak at national conferences (including charity organisation SEBDA who supports social, emotional and mental health difficulties), and contributing to the writing of the DfE's guidance Teaching Online Safety In School.

We're highly qualified and experienced

Our accreditations include 360 Degree Safe Online Safety Mark Assessor, EPICT e-safety facilitator and Assessor, Google Educators, Apple Education Trainers, MIE Trainer - Microsoft Innovative Educator, EU GDPR Practitioners, STEM CPD Facilitators, J2e Trainers, Purple Mash Trainers and Bett Award Winners.
